Title (description) Release A Sun (Solaris) machines need Motif static libraries for the building of EOSView.

Documents Affected	Source Nos (RID, NCR, etc.) or Tech Reference

RTM Change [ ] **Start New Baseline** [ ]

Problem

The new Release A baseline has removed the Motif libs from SUNWmotif and have now installed Motif using a package called CDE. The only libraries now installed are the shared object libraries. These are runtime libraries. EOSView needs the Motif static libraries to build.

Proposed Solution

Install full development Motif, to include static libraries, on all Release A Sun platforms (i.e. tokyo).
